New Delhi , India

About Me

As a B.E. Computer Science Engineering student at Chitkara University, I have a deep passion for coding and technology. My expertise lies in Python, and I enjoy leveraging it to build innovative projects. I am always eager to explore new technologies and stay updated with the latest advancements in the tech world. I thrive on solving complex problems and continuously seek opportunities to learn and grow in this dynamic field.

Projects

2ndHand .com

a website made using html,css,javascript for buying and selling used stuff (only frontend)

matrix calculator (mini - project)

a calculator made using numpy library in python ,performing various operations on matrices such as addition,subtraction,multiplication,division,transpose

weather app (mini - project)
